

# ProNovos Construction Financial Intelligence

ProNovos financial Intelligence tool protects profits and cash flow by leveraging existing financial data to effectively track, forecast, and visualize to make data-driven decisions for construction projects.

## WHAT WE DO

We transform complex data into actionable insights, protecting profits, and fostering financial literacy across all construction professionals.

## WHAT PROBLEM WE SOLVE

Construction professionals do not have the tools to leverage accounting software and financial data to effectively track, interpret, and make data-driven decisions for their projects.

## VALUE PROPOSITION

Our key business value is removing financial uncertainty by protecting profits and cash flow.

By integrating more data streams into ProNovos' analytics engine, we have been able to make better decisions in the office and the field. With respect to accuracy, ProNovos is superior to semi-manual, spreadsheet-based approaches.

**Joe Bonacci**  
CFO at GLY
